

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	01 July 2025
Team ID	23A51A4222
Project Name	Leave Approval System
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Requirement	Description	Details / Explanation
FR-01	User Login	Employees and managers can log in to the ServiceNow application.	• Users authenticate using their ServiceNow credentials. • Access is based on roles (Employee / Manager).
FR-02	Leave Request Form	Employees can submit leave requests by entering leave type, start date, end date, and reason.	• Form includes fields for Leave Type, Start Date, End Date, Reason. • Mandatory fields must be completed before submission.
FR-03	Date Validation	The system must prevent the end date from being earlier than the start date.	• End date should be greater than or equal to start date. • Invalid requests will show an error message.
FR-04	Leave Type Selection	Employees can select different leave types (Casual, Sick, Earned, etc.).	• Leave types are configured in the system. • Employees can choose from the available leave types.
FR-05	Manager Approval	Leave requests are automatically routed to the appropriate manager using Flow Designer.	• System identifies the employee's manager. • Request is routed automatically based on mapping rules.
FR-06	Approval / Rejection	Managers can approve or reject leave requests.	• Managers can view request details. • Managers can approve or reject with comments (optional).
FR-07	Notifications	The system sends notifications after approval or rejection.	• Employees receive notification for approval or rejection. • Managers receive notification for new requests.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Requirement	Description	Details / Explanation
NFR-01	Performance	The system should process leave requests quickly with minimal delay.	• Leave requests should be submitted and processed quickly. • Page load time and response time should be optimal.
NFR-02	Reliability	The application should operate consistently without failures.	• The system should function without errors or unexpected failures. • Data should be consistent and not lost.
NFR-03	Security	Only authorized users can access and manage leave requests.	• Users authenticate using their ServiceNow credentials. • Role-based access (Employee / Manager) must be enforced.
NFR-04	Availability	The system should be available whenever users need to access it.	• The system should be accessible during business hours. • High availability for all users.
NFR-05	Usability	The interface should be simple and user-friendly.	• The system should have an intuitive and easy-to-use interface. • Users should be able to complete tasks with minimal effort.
NFR-06	Accuracy	The system should validate dates and maintain correct leave records.	• The system should validate inputs (dates, leave balance, etc.). • Leave records and calculations must be accurate.
