

Project Design Phase

Problem – Solution Fit

Date	01 July 2026
Team ID	23A51A4222
Project Name	Leave Approval System
Maximum Marks	2 Marks

Solution Fit:

The proposed Leave Approval System in ServiceNow automates the entire leave management process by allowing employees to submit leave requests online, automatically routing them to the appropriate manager for approval using Flow Designer, updating the request status based on the manager's decision, and notifying employees through email. This solution reduces manual work, minimizes errors, improves transparency, and maintains accurate leave records for efficient leave management.
