

Project Development Phase Model Performance Test

Date	01 July 2026
Team ID	23A51A4222
Project Name	Leave Approval System
Maximum Marks	2 Marks

Model Performance Testing:

1.Submit Leave Request:

The employee entered all mandatory details, including Employee Name, Manager, Leave Type, Start Date, End Date, Reason, and Request State. Since the selected dates are valid and all required fields are completed, the system accepts the request without displaying any validation errors. This confirms that the leave request form correctly processes valid inputs and is ready to trigger the automated approval workflow through Flow Designer, ensuring reliable and accurate request submission.

The screenshot displays the ServiceNow 'Leave Request - Create LEA0001020' form. The form is titled 'Leave Request - Create LEA0001020' and includes a breadcrumb trail 'Leave Request - Create LEA0001020'. The application scope is 'Leave Approval System' with the update set 'Default (Leave Approval System)'. The form fields are as follows:

- Employee: Akhil Employee
- Manager: Manager user
- Leave Type: casual leave
- Start Date: 2026-07-03
- End Date: 2026-07-07
- Reason: Vacation
- State: Requested

A 'Submit' button is visible at the bottom left of the form. The form is displayed in a browser window with the URL 'dev311187.service-now.com/now/nav/ui/classic/params/target/x_1963686_leave_0_leave_request.do%3Fsys_id%3D-1'. The browser's address bar shows the URL. The ServiceNow logo is visible in the top left corner. The top right corner shows the application scope and update set. The bottom of the browser window shows the Windows taskbar with the date '03-07-2026' and time '20:27'.

2.Validate Leave Dates:

During testing, a leave request was submitted with the End Date (2026-06-28) earlier than the Start Date (2026-07-03). The system correctly detected the invalid input and displayed the error message "End Date cannot be earlier than Start Date." This confirms that the implemented validation logic prevents incorrect leave requests from being submitted, ensuring data accuracy and maintaining the integrity of the leave approval process.

Employee: Akhil Employee

Manager: Manager user

Leave Type: casual leave

Start Date: 2026-07-03

End Date: 2026-06-28

Reason: Vacation

State: Requested

Submit

3.Manager Approval:

After the employee submitted a valid leave request, the request was automatically routed to the assigned manager through ServiceNow Flow Designer. The manager reviewed the request and changed the approval State from Requested to Approved. The activity log records the approval action along with the approver's name and timestamp, confirming that the workflow executed correctly, updated the approval status, and maintained an audit trail for future reference.

Activities: 2

- Manager user | State: Approved was Requested | Field changes • 2026-07-03 08:15:30
- System Administrator | Approver: Manager user | State: Requested | Field changes • 2026-07-03 07:57:15

4.Manager Rejection:

A leave request was successfully routed to the assigned manager through ServiceNow Flow Designer, where the manager reviewed the request and changed the approval State from Requested to Rejected. The manager also provided a rejection comment explaining that the employee had already taken multiple leaves during the month. The Activity Log records every action, including the state transition and manager's comments, ensuring complete traceability and transparency.

The screenshot displays the ServiceNow interface for an approval process. The top navigation bar includes 'ServiceNow Developers', 'Leave Request: LEA0001019', and 'Create LEA0001021 | Leave Rec'. The main header shows 'Approval - Leave Request: LEA0001019' with an 'Update set: Default Global' link. The form fields include 'Approver' (Manager user), 'State' (Rejected), 'Approval Reason' (empty), and 'Comments' (you are taking many leaves in this month i cannot give the approval. Thankyou). The 'Activities' section shows three entries: a comment by 'MU Manager user' at 11:30:59, a state change from 'Requested' to 'Rejected' by 'MU Manager user' at 11:30:59, and a state change from 'Requested' to 'Rejected' by 'System Administrator' at 11:28:35.

5.Approval/Rejection Notification:

the successful execution of the email notification feature after a leave request is approved. Once the manager changes the leave request status to Approved, the ServiceNow Flow Designer automatically triggers the Send Email action. The email record is created with the notification type set to SMTP, the target linked to the corresponding leave request, and the employee's email address listed as the recipient. The email contains the subject "Leave Request Approved" along with a predefined message informing the employee that their leave request has been approved.

The screenshot shows the ServiceNow 'Email - Leave Request Approved' configuration form. The form includes fields for Type (send-ready), Target (Leave Request: LEA0001020), User, Notification type (SMTP), UID, Created (2026-07-03 08:15:31), Deleted (checkbox), Weight (0), Importance, Subject (Leave Request Approved), Recipients (akhilemployee@gmail.com), and Body (HTML template: <html><head></head><body><p></p><p data-tinymce-rootblock="">Hello \${Employee}.</p>). The form has 'Update' and 'Delete' buttons at the top right.

6.View Leave Status:

Once the manager approves the leave request, the Flow Designer automatically updates the corresponding Leave Request record by changing its State from Requested to Approved. The record displays all submitted details, including the employee name, manager, leave type, leave dates, and reason, while reflecting the final approval status.

The screenshot shows the ServiceNow 'Leave Request' record for LEA0001020. The record displays the following details: Employee (Akhil Employee), Manager (Manager user), Leave Type (casual leave), Start Date (2026-07-03), End Date (2026-07-07), Reason (Vacation), and State (Approved). The form has 'Update' and 'Delete' buttons at the bottom left. The URL bar shows the record's path: dev311187.service-now.com/x_1963686_leave_0_leave_request.do?sys_id=02962dae93710310f74bb6597bba106b&sysparm_record_target=x_1963686...
